Comments: UAA survey occurred in March, 2005 and no uses were observed. The stream flowed into a 100 acre reservoir (Willow Brook Lake) that met the maximum depth criterion at sites 140 and 141, however the remainder of the stream did not meet the maximum or average depth criterion. This is in a Conservation Area and has boat access. Although follow up interviews indicated that there was no swimming, there was not sufficient evidence to rebut a whole body contact designation for the reservoir. The committee recommends retention of the use for sites 140 and 141 only.

**Committee Recommendation:** ☐ Retain Use ☒ Modify Use ☐ Remove Use
